A New Era in Feline Pain Management (1 Credit Hour)

Kristin Shaw DVM, MS, PhD, DACVS, DACVSMR

Cats are finally having their moment! This presentation will review the diagnosis of OA and chronic pain in cats and introduce nerve growth factor (NGF) as a novel therapeutic target. The session will also discuss the recently approved anti-NGF monoclonal anti-body for the control of OA pain in cats as well as other multi-modal options for managing chronic pain in cats.

Learning Objectives:

- Understand how OA causes chronic, maladaptive pain and the consequences of unmanaged pain.
- Learn the latest recommendations for comprehensive, long-term OA and pain management, including the importance of proactive and uninterrupted pain management.
- Learn how to incorporate screening tools and checklists into practice to identify OA early and track response to treatment.

10 - 10:15 AM

Questions

10:15 - 11:05 AM

Attended: _____

Sponsored by

Pulmonary Hypertension in the Canine Patient (1 Credit Hour)

Sara Beth Bordelon, DVM, MS, Diplomate, ACVIM (Cardiology)

Description: This lecture will review the definition, pathophysiology, clinical signs, and diagnostic testing for pulmonary hypertension. We will also study classification of pulmonary hypertension, based on ACVIM Consensus Statement, and learn how to medically manage the condition

Learning Objectives:

1. Review normal pulmonary physiology

2. Learn the ACVIM consensus classifications for pulmonary hypertension
3. Learn how to diagnose and manage pulmonary hypertension in dogs

11:05 - 11:20 AM

Questions

11:20 - 11:30 AM

Break

11:30 AM - 12:20 PM

Attended: _____

Sponsored by

Anaphylaxis: An Evidence Based Approach (1 Credit Hour)

Katie Rhue, DVM, DACVECC

This presentation will review the pathophysiology related to anaphylaxis in dogs and cats as well as the evidence behind the currently recommended treatments for this condition.

Learning Objectives

1. To familiarize attendees with the physiology behind anaphylaxis in the dog and cat.
2. To review the most common causes of anaphylaxis in dogs and cats
3. Review of the diagnosis of anaphylaxis
4. Review commonly recommended treatments and the evidence available to support treatment use

12:20 - 12:35 PM

Questions

12:35 - 1:15 PM

Lunch Break

1:15 - 2:05 PM

Attended: _____

Sponsored by

Systemic Fungal Diseases in Dogs and Cats (1 Credit Hour)

David Stewart Bruyette, DVM, DACVIM

Systemic fungal diseases cause significant morbidity and mortality in dogs and cats. In this presentation the participant will learn about the more common organisms causing systemic disease (*Histoplasma capsulatum*, *Blastomyces dermatitidis*, and *Coccidioides sp.*) including their biology, clinical disease manifestations, diagnosis, differentials, and treatment as well as promising work towards development of a preventive vaccine.

2:05 - 2:20 PM

Questions

2:20 - 2:35 PM

THE VETS

Meet The Vets

Get to know The Vets, a veterinary house-call service offering shorter work hours, better quality of life, and an easier path to low-stress visits for you, your patients, and your clients.

2:35 - 2:45 PM

Break

2:45 - 3:35 PM

Attended: _____

Sponsored by

Canine Atopic Dermatitis: What's New in Treatment Approaches? (1 Credit Hour)

Frane Banovic, DVM, PhD, DECVD

Canine atopic dermatitis (CAD) is a common skin disorder in small-animal practice and is defined as a hereditary predisposition to develop pruritic

inflammatory skin disease associated with IgE antibodies, which typically target environmental allergens. Knowledge of disease pathogenesis is critical to the identification of the best target for therapy. This presentation will review the pathophysiology, diagnosis, and treatment of atopic dermatitis.

Learning Objectives

- Identify treatment options for treatment of atopic dermatitis and optimize a therapeutic regimen for an individual patient
- List common flare factors for canine atopic dermatitis
- Distinguish reactive and proactive topical treatment approaches in canine atopic dermatitis

3:35 - 3:50 PM

Questions

3:50 - 4:40 PM

Attended: _____

Sponsored by

Corneal Ulcers (1 Credit Hour)

Jed Darden, DVM, Practice Limited to Veterinary Ophthalmology

Attendees will learn how to clinically diagnose the different types and causes of corneal ulcers in domestic animals. Through image recognition and case presentation, learn how to recognize and manage clinical complications of ulceration such as bacterial keratitis, keratomalacia, and corneal perforation. Attendees will review corneal anatomy and pathology. Medical and surgical management of corneal ulcers including antimicrobial sensitivity will be reviewed.

4:40 - 5:15 PM

Questions/Discussion/Conclude for the Day

Thank you for spending the day with us!
